Profile

C-DAC PGCP-AC (Advanced Computing) professional with hands-on project experience in Java, Spring Boot, Microservices, REST APIs, Spring Security/JWT, Hibernate/JPA, and MySQL. Strong foundation in Core Java, OOP, Collections, Exception Handling, and Multithreading. Hands-on exposure to Git, Maven, Jenkins, Docker, Kubernetes, GCP, and RabbitMQ through academic projects. Experienced in developing secure REST APIs, implementing microservice architectures, and deploying containerized applications. Seeking opportunities in Java Backend and Full-Stack Development.

Skills

Programming Languages :

Java, C++, Python, JavaScript, SQL

Java / Backend

Core Java, OOP, Collections, Exception Handling, Multithreading, Java 8, Spring Boot, Spring Security, REST APIs, Hibernate/JPA

Microservices

Microservices Architecture, Spring Cloud Gateway, Netflix Eureka

Database :

- MySQL, SQL, Relational Database Concepts
- MongoDB, NoSQL Concepts

Manual Testing :

Test Cases, and Test Scenarios, Test Plans and Test Documentation, Bug Reports and Defect Management, Testing Types (e.g., Functional, Regression, Integration), SDLC and STLC Knowledge Agile Methodology Understanding API Testing Experience.

Projects

Bus Booking & Management System

07/2026 – 08/2026

Java, Spring Boot, Spring Security, React.js, MySQL, Docker, Jenkins

- Developed a scalable bus booking system using microservices architecture for online ticket booking and management.
- Designed independent services for authentication, user management, package management and administration.
- Integrated Spring Cloud Gateway and Netflix Eureka for API routing and service discovery.
- Implemented JWT-based authentication and secure REST APIs using Spring Security.
- Used MySQL for persistent storage and React.js for the user interface; exposed backend functionality through REST APIs.
- Containerized services with Docker and deployed using Kubernetes on Google Cloud Platform; used Jenkins for CI/CD workflow.

Student Placement Management Portal

05/2026 – 06/2026

Java, Spring Boot, Spring Security, Hibernate/JPA, React.js, MySQL

- Built a centralized platform for students, recruiters and placement officers to manage placement workflows.
- Developed student profiles, resume uploads, job applications, application-status tracking and recruiter workflows.
- Implemented JWT authentication with Spring Security and persistence using Hibernate/JPA and MySQL.
- Developed the frontend using React.js and integrated it with Spring Boot backend services through REST APIs.

Education

C-DAC PGCP-AC (Advanced Computing) professional,

Sunbeam Institute of Information Technology, Pune

02/2026 – 08/2026

Pune, India

B. Tech.B.Tech. in Mechanical Engineering,

Vishwakarma Institute of Information Technology

2019 – 2023

Pune

Certificates

- Programming for Everybody (Getting Started with Python)
- Gen-AI (CDAC)

Languages

- English
- Hindi
- Marathi
